

Queensland's New Processing Capabilities

FICEP FRC1201 – Robotic Plasma Oxy Coper

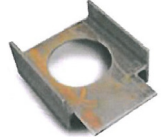

Automatic CNC thermal cutting lines for structural steel, RHS, merchant bars and pipes

Coping

Penetrations

Hollow Sections

Acute angle mitres

Why should you choose us for all your steel processing?

- Support the Australian Steel Industry: we are one of the largest supplier of manufactured steel in Australia
- We keep it simple for you: we offer the most complete one-stop processing solution nationwide
- Our priority is your priority: our aim is to maximise your productivity
- Our processing is fast, accurate and reliable

Additional processing capabilities overleaf...

Yes, we can.

Queensland's New Processing Capabilities

FICEP FRC1201 – Robotic Plasma Oxy Coper

	Minimum Size	Maximum Size
Sections	AN 90 x 90	WB1200

Customer benefits: Speeds up customer production time which increases productivity.

FICEP Robotic Plasma Oxy Coper

FICEP DD1203 Beamline

	Specifications
Sections – UB, UC, Welded Sections, Channels, Structural Angles	Structural sections, Merchant Bar, Rail and Tubular product. From 75mm width
Machine Capability	Cutting, Drilling, Mitre Cutting, Marking, CNC Programing
Maximum Length	20000mm
Mitre Cutting	Up to -45/+60 degrees
Tolerances	Standard +/- 2mm, Mill, -0 + 10mm

Customer benefits: Enhanced technology for a faster delivery time.

FICEP Beamline

Meba DGA 510 Fully Automatic Bandsaw

	Specifications
Cutting Capacity	500mm packs
Infeed	12000mm
Outfeed (fully automatic)	9000mm

Customer benefits: High speed and low cost production accuracy.

Meba Automatic Bandsaw

Adige Cold Saw

	Specifications
Diameter Capacity	100mm
Max Infeed	6500mm
Tolerances	+/- 0.2mm

Customer benefits: Tight tolerances and high repetition runs for the highest accuracy.

*Refer to your local Branch or Account Manager for more specific details and tolerances.

Adige Cold Saw
